are powered by

Corporate Rebels

The objective of this SAFARI is to look at COMPLIANCE ISSUES against the backdrop of all the Regulatory challenges LEGAL PRACTITIONERS face.

The better we are informed the better we are equipped.

In general, **compliance** means conforming to a rule, such as a specification, policy, standard or law. **Regulatory compliance** describes the goal that organisations aspire to achieve in their efforts to ensure that they are aware of and take steps to comply with relevant laws, policies, and regulations. Due to the increasing number of regulations and need for operational transparency, organisations are increasingly adopting the use of consolidated and harmonised sets of compliance controls. This approach is used to ensure that all necessary governance requirements can be met without the unnecessary duplication of effort and activity from resources.

Set aside **1** day and be informed by **7** Presenters in the **5** star Kgotla Venue of the Indaba.

Topics cover Compliance Risks flowing from Legislation

Legal Practice Act – Financial Intelligence Centre Act
Consumer Protection Act – National Credit Act
Protection of Personal Information Act
